Lesson 08 - HTML Site

We've covered the foundational concepts of HTML over the past few lessons. Let's take this time to put everything together and build a multiple page website for yourself. It will look pretty plain but once we get into styling we will come back to this same code and make it prettier!

Exercise Instructions

We're going to build a fake website for you that contains a home page, an about page, and a contact page with a form.

Have some fun with it! Add your own spin to these pages. Think it needs more images? Load it up! These are only guidelines.

Every page should have:

- A document `<title>` in the format of `<Page Title> | <Your Name>`, e.g. `Home | Ozzie Neher`

- A `<header>` with

    - An image of you (or take one from https://uifaces.co)
        - if your image is too big, resize it using the `width=""` and `height=""` attributes of the `<img />` tag
    - The second level heading `<Your Name>'s Portfolio`
    - A `<nav>` with a link to each page
    - A `<hr />` after the header
    - A `<main>` tag should contain all of the page specific content below

- Create a home page, `index.html`

    - Add a title, "Home"
    - Add a short introduction for people to read, welcoming them to your site
    - Add a form that will allow people to search google
        - Create the form with `method="GET"` and `action="https://google.ca/search"`
        - Place a text input with the name of `q` (this is important! google is expecting this)
        - Place a submit button that says "Search Google"

- Create an about page, `about.html`

    - Add a title, "About"
    - Add 3 paragraphs about you, or lorem ipsum

- Create a contact page, `contact.html`

    - Add a title, "Contact"
    - Create a form with the `method="GET"` and `action="contact-success.html"`
    - Create 3 inputs, Name, Email, and Message
        - All 3 should be required

- Message should be a `<textarea>`
    - Create a submit button

- Create a contact success page, `contact-success.html`

    - Add a title, "Contact Form Sent!"
    - Add a paragraph, "Thank you for reaching out. I'll get back to you as soon as I can."
    - Add another paragraph, "In the mean time, find out more about me by visiting my about page."
        - "about page" in the above paragraph should link to your about page
